DETAILED ACTION

The response filed **March 13, 2006** presents remarks and arguments to the office action mailed **November 09, 2005**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Response to Arguments

Status of Claims

Claims 1-20 are pending in this office action.

Affidavit

The affidavit filed 3/13/06 has been acknowledged and entered.

Claim Rejections - 35 USC § 112

Applicant traverses that the terms substituted and unsubstituted are terms commonly used and are clear as written with an affidavit, exhibit A to support.

In response, although this is a term that is commonly used it is however indefinite as to what is meant by substituted and unsubstituted. Clearly Applicant cannot claim every single unsubstituted and unsubstituted variations of the compound as this encompasses a very large number of compounds. Therefore, identifying the compounds that are claimed is required.

The rejection is hereby maintained with respect to claims 1 and 7-11 and hereby repeated.

Claims 1 and 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 7-11 where Rⁿ is a substituted or unsubstituted alkyl/aralkyl/aryl group are indefinite connoting no information as to what substituents are used, therefore, examiner suggests using substituents selected fromgroups from the specification.

Claim 8 recites substituted and optionally substituted cycloalkyl, aryl, C₁-C₄ aralkyl and cycloalkylalkyl groups, but surely, they do not all carry the same properties. Therefore, examiner suggests applicant clearly states the compounds or groups that are considered and use the above suggestion supra for the substituted Rⁿ.

Claim 8 recites the limitation "aralkyl" in line 3. There is insufficient antecedent basis for this limitation in the claim 1.

Double Patenting

Applicant will address this issue when claims are allowed therefore the rejection is maintained as no traversal was made because the rejection is to a provisional US application. The rejection is hereby maintained and repeated.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1614

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1-20 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-26 of copending Application No. 10/719,055. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: The claims are drawn to a composition and method of inhibiting rejection of a transplant organ composition, using formula

in the instant claim with rapamycin or CD40L. The only difference between the instant application and the co-pending application is in the instant claim adjuvant therapy is used while the co-pending claims treat the condition with only the compound of formula I. Thus the claims of the instant application are within the scope of the co-pending application.

Claim Rejections - 35 USC § 103

Applicant's arguments, with respect to the above rejection have been fully considered and are persuasive. The rejection has been withdrawn.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
